IETF Hackathon

IETF 113

19-20 March 2022

Online

Hackathon Plan

One Tax API

- No RFC's yet, but is related to previous RFC's for forward secrecy
- Relevant to web monetization
- Try out and understand McTiny
    - a sync flood resistant forward secrecy preserving protocol
    - Public domain code https://mctiny.org/software.html
    - USENIX 2020 presentation
    - https://www.usenix.org/conference/usenixsecurity20/presentation/bernstein

Deploy the code, review the paper, take measurements

What got done

What you achieved? (key results)

- Deployed on and ran the code on the cloud using Ubuntu 20.04 and Rocky Linux 8
- Started on simplified examples of McEliece enrcyption
- https://github.com/OneTaxApi/McEliece

What we learned

- Implementation seems to work, but needs further examination
- Needs real world testing for sync flood resistance
- Needs real world testing for forward privacy

Wrap up

Team members:

    - Benson Muite

First timers @ IETF/Hackathon:

-
